

**National Institute for
Health Research**

CRN Eastern Radiotherapy Study Day

21st October 2016, Chesterford Research Park, Saffron Walden, CB10 1XL

Chaired by Professor Neil Burnet, University of Cambridge

Key note speakers include

Dr Raj Jena
University of Cambridge

Dr Pooja Jain
Leeds Teaching Hospitals

Dr T Ajithkumar
Cambridge University Hospitals

Dr Charlotte Cole
Cambridge University Hospitals

Prof. Ricky Sharma
University College London

Dr Gerry Hanna
Queen's University Belfast

Prof. David Sebag-Montefiore
University of Leeds

Karen Venables
Mount Vernon Hospital

David O'Doherty
Cambridge University Hospitals

Sponsored by

Varian Medical Systems' mission is to focus energy on saving lives. To meet this challenge, we equip the world with new tools for fighting cancer, taking X-ray images, and protecting ports and borders. Since the 1950s we have been producing tools that harness the power of X-ray energy to benefit humankind. In recent decades, we have pioneered developments in the fields of radiotherapy, radiosurgery, X-ray tube technology, digital image detectors, cargo screening, and non-destructive testing. We have a robust product portfolio, and long-standing relationships with many of the world's leading clinicians and manufacturers of industrial and medical imaging systems. As Varian continues to grow, our staff of over 7,000 people in 70 sales and support offices around the globe is developing innovative, cost-effective solutions that help make the world a healthier, more secure place. For more information, visit www.varian.com

Oncology Systems Limited (OSL) provides a full range of equipment and solutions for the treatment of cancer using radiotherapy, including hardware and software solutions and consumables. Products include: SpaceOAR hydrogel for perirectal spacing during prostate treatment, MacroMedics patient positioning solutions, Cortex fiducial markers, CEMAR positioning lasers (for CT and linac), ProSoma virtual simulation software, OnQ rts® deformable image registration software and INTRABEAM intra-operative radiotherapy.

IEL represents over 35 manufacturers and specialises in the effective use of radiation in medicine for both diagnostic and therapeutic purposes. IEL is extremely proud to be representing such global market leaders in the Radiotherapy arena as; Viewray, Sun Nuclear, CIRS, CIVCO, Gammex and Leeds Test Objects, thus being able to accurately match customers' requirements and build packages that meet both their technical specifications and budgetary demands. Our team of specialist radiotherapy sales consultants represented at the event by Jack Knight and Phil Neale, supported by a dedicated and experienced technical team; provide a personal, high-quality service to customers across the UK and Ireland. Imaging Equipment Limited is owned by Advanced Accelerator applications PLC (AAA) of Geneva, Switzerland, NASDAQ:AAAP. For more information www.imagingequipment.co.uk

Pierre Fabre is the second largest dermo-cosmetics laboratory in the world and the largest private French pharmaceutical group. In 2015, it generated over 2.2 billion euros in sales, of which 57% came from the dermo-cosmetics sector and 58% from international business. Pierre Fabre, which has always been based in Languedoc-Roussillon-Midi-Pyrenees region in Southern France, has subsidiaries in 43 countries and distribution agreements in over 130 countries.

Accuray is a radiation oncology company that develops, manufactures and sells precise, innovative tumour treatment solutions that set the standard of care with the aim of helping patients live longer, better lives.

Programme

9.30 -10.00	Registration and coffee
Chair:	<i>Prof Neil Burnet, Professor of Radiation Oncology, University of Cambridge</i>
10.00 – 10.10	Welcome and introduction
10.10 – 10.40	The role of radiotherapy in cancer management and the future of radiotherapy research <i>Dr Charlotte Coles, Cambridge University Hospitals</i>
10-40 – 11.20	Understanding modern radiotherapy techniques: IMRT, IGRT, SRS, SABR and Protons <i>Dr Raj Jena, University of Cambridge</i>
11.20- 11.50	Management of radiotherapy side-effects <i>Dr Pooja Jain, Leeds Teaching Hospitals</i>
11.50- 12.20	An Overview of the current radiotherapy trials <i>Dr T Ajithkumar, Cambridge University Hospitals</i>
12.20 – 1.00	Lunch
1.00 – 1.30	Bench to Clinic: Working in the translational space <i>Prof Ricky Sharma, University College London.</i>
1.30 – 2.00	The evolving role of combined modality treatment of radiotherapy with systemic agents <i>Dr Gerry Hanna, Queens University Belfast</i>
2.00 – 2.30	The national pathway for setting up radiotherapy clinical trials <i>Prof David Sebag-Montefiore, University of Leeds</i>
2.30 -3.00	Challenges of Radiotherapy trials: A national perspective <i>Karen Venables, Mount Vernon</i>
3.00 – 3.30	Setting up complex radiotherapy trials: A planning perspective <i>David O'Doherty, Cambridge University Hospitals</i>
3.30 – 3.45	My role as a radiotherapy clinical trial practitioner (sharing the experience)
3.45	Feedback and close

Places are free so you're encouraged to book early. To reserve your place please send to
