Dear Dr. Mohylyuk:

On behalf of the AAPS Board of Directors, I would like to offer my congratulations on your being selected for the 2020 AAPS Best Abstract Award. This award brings attention to the most exciting research to be found in the posters, based on abstracts that are submitted and screened before the event.

Your abstract titled, *Development of Sustained Release Lipid-Based Matrix Microparticles for Vaginal Delivery using Twin-Screw Hot Melt Extrusion* was among the top 10% of abstracts based on high ratings by AAPS Abstract Screening Committee.

AAPS will recognize the winning abstracts as research that is not to be missed during AAPS PharmSci 360, to be held October 26–November 5. Please note that in order to receive this recognition, you must register for the meeting to have your abstract and poster included in the collection as scheduled by the Abstract Technology Manager, Teresa Homrich.

If you have further questions regarding your award, please contact Awards and Fellows Coordinator, Me'Gesha Portlock at portlockm@aaps.org or 703.248.4781.

Again, my congratulations on your award. We look forward to seeing your poster this fall!

Sincerely,

Joseph W. Polli, Ph.D., FAAPS
AAPS President
